Teaching, Learning, and AI

A Practical Workshop for Teachers on Learning in the Age of AI

For Teachers **4 Hours** **10:00–14:00** **Bring a Laptop**

Tired of being slop-slapped with essays students generated? This workshop was written by a research and measurement in the EdTech industry to show teachers how make students think again. We will teach educators how to better measure student understanding and even leverage the weaknesses of AI to design assignments that promote critical thinking and turn AI literacy into a natural part of any existing course.

10:00–10:40 · 1. Teaching AI Literacy

- Introductions.
- LOMLOE and critical thinking competencies.
- **Discussion:** What does it mean to demonstrate learning when a machine can generate the answer?

10:40–11:20 · 2. Incorporating AI Literacy into Every Course

- Tokens, prompts, and large language models: demystifying the jargon.
- Incorporating AI literacy into mathematics, science, language and history.
  - The statistics of AI model development.
  - Critical source analysis of historical texts.
  - Identifying trustworthy sources.
  - Literary Analysis.

11:20–11:40 BREAK 20 MINUTES

11:40–12:40 · 3. Stop Getting Slop Slapped

- How AI generates plausible answers without necessarily understanding the subject.
- Shift the burden of grading and revision onto students.
- Designing lessons around critical source analysis.

12:40–13:00 BREAK 20 MINUTES

Bringing the Education back to EdTech

Product Insights · Measurement & Research Design · Course and Curriculum Development

13:25–13:50 · 5. Literary Greats vs. Outputting the Average

- Leveraging statistics to teach literature.
- Using model evaluations for comparative analyses.

13:00–13:25 · 4. Avoid these Mistakes When Using AI as an Educator

- Where AI generated learning materials commonly fail.
- Pattern recognition or construct mastery.
- Problems with AI autograders.

13:50–14:00 Takeaways and School Action Plan

- School action plan delivered by administrators.

No technical background required—just classroom experience, curiosity, and a willingness to rethink how learning is demonstrated.
